

LED Driver IC

with Wide Input Voltage Range and Constant Current Regulator

Features

- > 150V wide range operating voltage
- > Voltage surge suppressing
- > Adjustable output current
- > Universal 100VAC to 220VAC input
- > Negative Temperature Coefficient
- > Less components in application

Applications

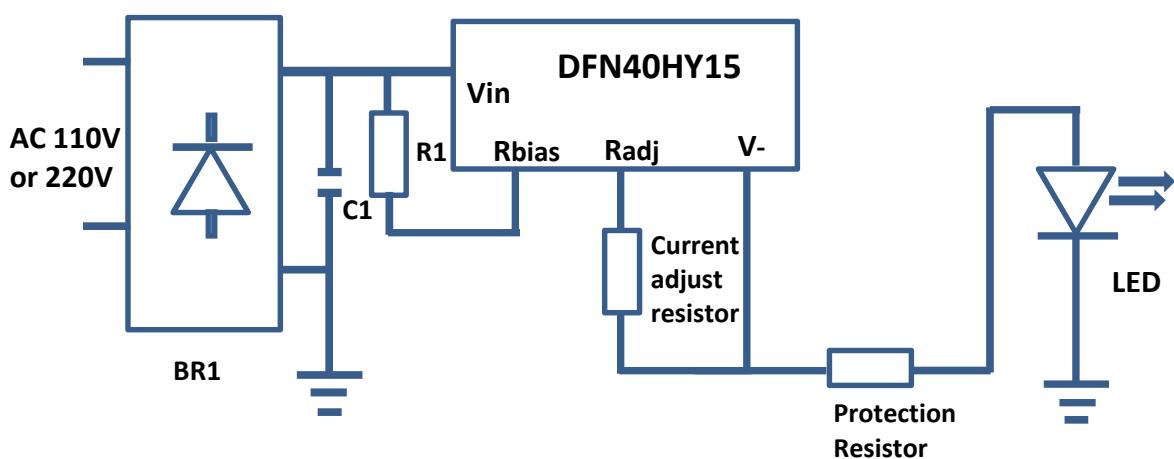

- > AC lighting panels, display signage, decorative lighting, channel lettering
- > Automotive applications: side mirror display, lamp post, display light and backlight
- > Switch maintain current control
- > Household or industrial LED bulb, fluorescent lamps, mining lamps.

General Description

The DFN40HY15 is a linear constant current regulator IC. It is a simple, economical and robust device designed to provide a cost-effective solution for regulating current in LEDs, and able to reserve constant current feature within a large voltage range, suitable for 110V or 220V power supply LED bulb, LED tube, Ultra thin lamp.

When DFN40HY15 is used as a multi-segment LED driver, the PFC can reach 0.98, efficiency exceed 0.93.

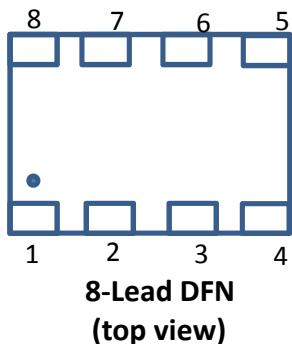

The IC is equipped with negative temperature coefficient protection and packaged in a 8-Lead 3mm x 3mm DFN package.
